Mums from Minnesota

The Hardy Mum Headquarters of the Nation

Our new catalog listing 137 varieties of garden Mums which we consider to be the very best varieties for American conditions, comes to you with our compliments. We believe that our *Better-grown* and *sure-to-bloom* Mums, grown from virgin cuttings and sent to you with a ball of real estate around the roots, are the cheapest and the best plants that money can buy. All our plants are guaranteed to be true-to-name and as represented in our catalog. We will cheerfully refund the amount paid for any plants that prove otherwise.

WE SPECIALIZE. We grow only Hardy Mums and grow them well. Our very modern establishment is located in southern Minnesota and has been built especially for the growing of better Hardy Mums.

Dependable blooming dates, descriptions and growth data are recorded each year and are from actual observations in our own test gardens. This enables us to offer only the newest and most dependable varieties.

Experience has helped us to set up one of the finest packing systems in the country. Many of our plants have been shipped to foreign countries and have arrived fresh and moist. Our highly skilled packers have had many fine letters saying that the plants came through looking as fresh as when they were packed.

You can be sure of better-grown, better-packed and sure-to-bloom Mums when you order from us.

Plants will be ready and available from February 15 to June 1.

Only This Hoe Will Do These Tricks-Just Try One

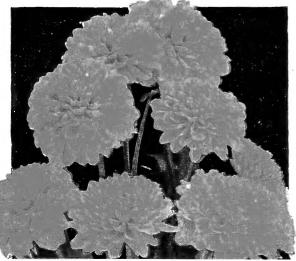

Am I ever pleased over the boe you sent me. I'm really delighted. Seems more like the answer to prayer. Mrs. F. W. Massillon, Obio:

Thanks very much for the boe received. It is the best little tool I have ever used. My bobby is Roses and Chrysanthemums and this little boe is so good to use around my plants.—Mrs. O. F. S. Burley, Idaho:

To say I'm satisfied is a mild statement. Just wby basn't someone thought of this before?—Miss L. P.

New Rochelle, New York:

I received the hoe I ordered from you and have shown it to my neighbors and as a result I am enclosing a check to cover the price of five more boes. I congratulate you on the neatest garden tool I've ever handled.—Mrs. W. A. K.

Short Hills, N. J. Just a note to let you know that this spring I purchased your "Surprise Collection." The plants arrived in excellent condition and for the past five or six weeks have been in profuse bloom. We are more than pleased!—A.W.H.

Mt. Vernon, Ohio I couldn't possibly have chosen such a beautiful and varied collection of Mums as I received in the "Surprise Collection" which I ordered two years ago. They have given me more pleasure than any of my flowers and I truly look forward to Autumn when they are to bloom.

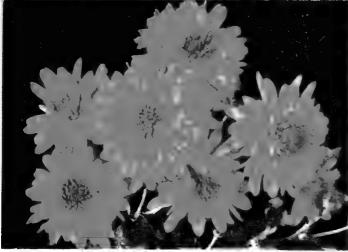

I want to add to my Mum collection this year and can think of no better way than to order another "Surprise Collection."—Mrs. G.M.W. Mt. Vernon, Ohio

THE BIG GREENHOUSE MUMS

IN YOUR GARDEN

Each year we have had more and more requests for a listing of the large greenhouse type Mums. These are not hardy in Minnesota but can be successfully wintered in New Jersey, southern Pennsylvania, south of the Mason and Dixon line, and on the Pacific Coast. In the North they can be grown outside in the garden until frost time in the fall and then potted up and brought inside. To produce those big flowers they must be disbudded, leaving from one to three flowers per plant and grown tied to a stake. Well-grown specimens are a magnificent sight at blooming time.

AMBASSADOR. Big, cream-white, incurved. Oct. 23. Each 50c.

GARNET KING. Reflexed dark red. Nov. 18. Each 50c.

HILDA H. BERGEN. Large, reddish bronze. Oct. 25. Each 50c.

KAY TASHIMA. White spider-flowering Commercial. Nov. 1. Each 50c.

MRS. H. E. KIDDER. Massive incurved bright yellow. Oct. 20. Each 50c.

DARK PINK NORMA. Deep lavender-gold crested anemone. Oct. 28. Each 50c.

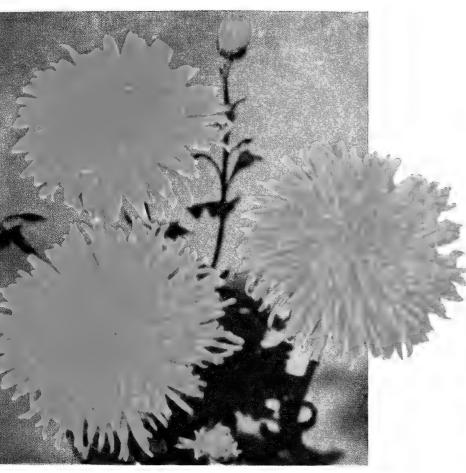

PINK CHIEF. Medium large, incurved lavender. Oct. 15. Each 50c.

SILVER SHEEN. Large silvery white. Oct. 18. Each 50c.

YELLOW LACE. Yellow spider sport of Queens Lace. Nov. 1. Each 50c.

KNEE-DEEP IN MUMS AT THE LEHMAN GARDENS

-Mum Culture and Care

CULTURE

Hardy Garden Mums are among the easiest of all hardy plants to grow. They will tolerate almost endless neglect and still survive and give some bloom. To have them at their best, give them good culture, a sunny location, a rich soil, and do not let them suffer for want of moisture during the hot summer.

Mums in the garden should be planted in an open, sunny location and should not be shaded by buildings, large shrubs or trees for more than three or four hours per day. Any fairly rich soil, be it sandy, clay or loam, that will grow other flowers and vegetables well, will also grow good Mums. Peat moss, leaf mold or barnyard manure worked into the soil is an excellent conditioner and much to their liking.

PLANTING

Spring is by far the best planting season. The proper planting time is when the spring garden work is well under way and the heavy, ice-freezing frosts are past. Planting can begin about the time early tulips begin to bloom and can be continued until peonies are in bloom. Here in southern Minnesota this would be from about late April until mid-June. Farther south this date would be advanced according to the climate. This gives the plants until fall to develop a good root system and enough top to give abundant bloom. Well-started plants grown in 2½-inch pots and planted with a ball of earth around the roots are the most satisfactory. One-year-old, field-grown clumps seldom give satisfactory results, for they are hard to handle and there are usually not enough roots to support the many shoots that spring up. In replanting old clumps, always divide them into individual shoots. Those from the outside of the clump are the strongest and should be retained; discard the old stumpy center crown. Field-grown divisions packed with moss about the roots are often offered; these will usually grow but seldom give a good account of themselves.

SUMMER CARE

Good culture during the summer, with regular loosening up of the soil about the plants to maintain a constant supply of moisture, to aerate the ground, and to keep weeds from becoming established, is all that is necessary to grow good Mums. One or two applications of a well-balanced commercial fertilizer are beneficial but not absolutely necessary. Roughly, about a small handful of commercial fertilizer per plant at about one-month intervals is sufficient. The first application can be made in late July or early August. This highly concentrated fertilizer should not be used when the soil is dry, because foliage and root burn will result. Be sure that plenty of moisture is available at time of application.

WATERING

The best way to water Mums is to make a saucer-like depression about the plant, lay the hose on the ground, and let the water run slowly. The following day the soil can be loosened up and leveled again. A thorough watering like this should be sufficient for a week or ten days, even during the hottest and driest weather. Sprinkling the plants from overhead should be discouraged, for that invites foliage diseases. By keeping the foliage of Mums as dry as possible, spraying should not be necessary in order to grow a good crop of flowers.

MUMS FOR YOUR WINDOW-BOX

When the first light frosts of fall have made your window-boxes unsightly by killing the tender plants in them, you can enjoy the full glory of Mums. These dreary-looking window-boxes can be transformed into a fairyland of color for two or three weeks by simply transplanting Mums from your garden into them. Select low, compact plants in full bud and bloom, dig them carefully and plant directly in the box.

OUR SURE-TO-BLOOM PLANTS

We believe our sure-to-bloom plants, grown from virgin cuttings, well established in $2\frac{1}{4}$ -inch pots and sent to you with a ball of good soil about the roots are the most practical and economical to buy. These will make fine blooming plants by October. We have hundreds of letters in our files from nearly every state in the country telling us how well our plants have done in all sections. Many of these plants were shipped over 2000 miles and still did remarkably well.

PINCHING

To have sturdy and well-branched plants it is advisable to pinch the terminal shoots once or twice during the season. This operation is done with the thumb and forefinger and consists of removing about ½ inch of the soft growing tip of the main shoots. The first pinching should be done when the plants are about 6 inches tall, to induce lateral branches. When these lateral branches are 8 to 10 inches tall, their tips should be removed to induce more branches. Discontinue pinching by August 1, as the plants will soon be forming buds. The very early-blooming varieties should not be pinched after July 15. A well-pinched plant will not need staking or other support, since the growth will be strong and sturdy and will stand erect.

WINTER PROTECTION

The purpose of winter protection is probably more to keep the cold in the ground than to keep it out. A favorable location, one which does not allow ice and water to stand over the plants, is very necessary. It is the alternate thawing and freezing that does the winter damage to garden Mums. After the tops have been killed by frost, the stems should be cut off 2 to 3 inches above the crown and burned to prevent the spread of foliage disease. We have found that any light, porous material that will remain more or less dry during the winter is ideal for covering. Excelsior, evergreen boughs, marsh hay, and cornstalks are very good if applied after the ground is slightly frozen. Leaves applied and kept dry with a waterproof covering will also make very fine covering.

BLOOMING TIME

It has been definitely proved that Chrysanthemums are sensitive to light and that the length of day determines the blooming time for a given variety. Shading a late-blooming variety with black cloth for a few hours, both morning and evening, will hasten its normal blooming time by two or three weeks. Electric lights will retard its normal blooming period.

Since Minnesota is quite far north, where naturally the fall days are shorter than farther south, a given variety will normally bloom 20 days earlier here than in Texas. We are located approximately 200 miles north of Chicago, and we know that the same variety will begin blooming for us four or five days sooner than in Chicago. From this we deduct that perhaps two days for every 100 miles of latitude is about the average difference in blooming time. Interesting, isn't it?

SPRAYING

We recommend a simple spray program in gardens that have a wide variety of plants, which naturally harbor insects and diseases. Mums, like many other plants, are subject to attack by aphis or plant lice. These are easily controlled by spraying with Nicotine Sulphate (Black-Leaf 40), which can be procured at any drug or department store.

One or two dustings during the summer with a 5 or 10 per cent DDT dust or spray will eliminate other insects that sometimes attack Mums, such as tarnished plant bug, leaf-hopper, leaf-rollers and the stalk borer. If you should have fungous trouble on the foliage, one or two sprayings with the new preparation called Fermate should keep your plants healthy.

In some parts of the East the foliar nematode has become very troublesome the past few seasons. Infected plants will lose their foliage, beginning at the bottom of the stalk, and by blooming time the entire plant may be defoliated. The dead leaves turn dark brown or black, become brittle and hang down along the stem. A half inch of tobacco dust mulch has been found effective in checking the spread of this pest.

Perhaps the best insurance against these pests and diseases is to be very critical of any newly acquired plant material. We have always prided ourselves on the health and vigor of our plants.

SEEING IS BELIEVING

Over 30,000 flower-loving people visit our fields and Mum show each year. We maintain a constant display of more than 300 varieties of the better Mums from September to November in our greenhouses and in outside beds. The overwhelming majority of these people fell in love with the following varieties—therefore, we consider them the best in our gardens. 30,000 people can't be wrong!

20 LEADERS

Magenta Spoon **Mary Harrison** Myrtle Walgreen **Nokomis Orchid Helen** Patricia Lehman Pink Opal **Royal Robe Tribute Yellow Avalanche**

SPECIAL

SURE-TO-BLOOM PLANTS \$ (1 each of above)

FROST RESISTANCE OF FLOWERS

In the past few years more attention has been paid to the damage done by frost to both buds and petals of different varieties. Some kinds-especially the white and lavender sorts-are damaged by the first light frosts, while others show no damage even when the temperature goes below freezing. Many varieties just keep right on blooming as though nothing had happened, while others are completely killed. We found the following varieties still in excellent condition in our fields on November 7 after four or five early freezes had spoiled most kinds:

Allegro Beacon Betty Courageous Cydonia **Echoes** Holiday Inspiration

Mary Harrison Myrtle Walgreen Pink Opal **Pink Princess** Royal Robe Snowfall **White Bounty** Yellow Blanket

Frost-Resistant Collection

SURE-TO-BLOOM PLANTS \$2.80 16 (1 each of above)

KODACHROME SLIDES

We have a beautiful set of one hundred 35 M.M. or 2-inch kodachrome slides of individual flowers of Mums, garden and field scenes, window-box plantings and other pictures of Mums in full color. These are available without cost to Garden Clubs or other reliable groups for use as programs. There is a short descriptive reading with the slides. Showing time about one hour. Projector and screen to be furnished by the organization using the pictures.

If interested in using these slides, for an interesting evening on Mums write to

E. C. LEHMAN

—The Lehman Gardens, Faribault, Minnesota.

THE ABC OF MUM CULTURE

- A Apple-blossom time is the beginning of Mum planting time,
- B Bonemeal is an excellent fertilizer for Mums.
- C Cover with porous light material for winter.
- D DDT 5% dust or spray will keep bugs off.
- E Early varieties are not recommended for hot climates.
- F Fall planting is not recommended in the North.
- G Give Mums an ordinary good rich soil.
- H Hardy Mums bloom from August to November.
- I Ice over the crowns in winter will kill them.
- J Join the National Chrysanthemum Society.
- K Keep well watered during hot dry weather.
- L Leaves are not good cover unless kept dry.
- M Mums from Minnesota can't be beat.
- N Nicotine sulphate (Black-Leaf 40) will kill aphis.
- O Overhead watering is not recommended.
- P Pinching keeps plants sturdy and low.
- Q Quality will improve by cultivation.
- R Remove all but a few buds to grow those large flowers.
- S Shade will make plants grow taller and bloom much later.
- T Transplant late varieties into pots before frost and enjoy them in the house.
- U Use a tablespoonful of commercial fertilizer per plant to give plants a good start.
- Very close planting will make spindly plants. Eighteen inches apart each way is sufficient.
- W Window-boxes are beautiful planted with Mums in fall.
- X Plant only sure-to-bloom plants.
- Y Young, vigorous, 2½-inch potted plants are best.
- Z Zinc labels are permanent.

Our Fall Mum Display

Everyone is cordially invited to our annual Fall Mum Show. Last season we had over 100,000 plants in our fields and well over 1,000,000 flowers. Here you can see growing side by side more than 500 varieties of Hardy Chrysanthemums. Many of these are seedlings—the Mums of To-morrow—in the different stages of selection. Really, it is a beautiful sight to see. Our very first varieties begin to bloom about mid-August, and by early September a great many of the earlier kinds are in full bloom. Between September 25 and October 10 is usually when the fields are at their best. During this time and until early November we maintain a display of most all varieties in our green-houses. This alone is well worth seeing. If you can, come and enjoy the MUMS with us.

MUM CHATTER

Here in southern Minnesota we experienced one of our worst growing seasons in the history of our weather bureau. The winter of 1950-1951 brought us 92 inches of snow-an all-time record. Our growing season was one of the coolest and wettest that we have ever experienced. We had over 43 inches of rain—another record, as our yearly average here is somewhere between 27 and 30 inches. This weather did not encourage the production of the brilliant

display of color we have had in the past.

However, among the newer things, Rouge Cushion, Patricia Lehman, Royal Robe, Cecil Beed, Canary, Dr. L. E. Longley, Lee Powell, Lemon Drop, Ming, Shalimar, Ruthann Lehman, Pink Opal, and Jayeff were exceptionally outstanding. Peach Spoon and Garnet Spoon also proved to be noteworthy among the spoons. One of our seedlings, No. 736, which we have named Red Torch this year, was one of the best. Of course, the old favorites like Betty, Beacon, Avalanche, Yellow Avalanche, Charles Nye, Chiquita, Pink Radiance, Huntsman and Carnival were exill your good. We are a support to be noteworthy among the spoons of the spoon val were still very good. We came up with our best Chiquita since

The past five or six years have seen tremendous improvement in the quality and range of colors in garden Mums. With the introduction of such wonderful recent yellows as Lee Powell, Ming, and Ruthann Lehman and with Charles Nye, Golden Hours, Early Gold, Golden Mound, Golden Carpet, Yellow Avalanche, Canary, Chiquita, Defiance and Moonbeams, the matter of yellow Mums is pretty well taken care of.

With such new varieties in the purple and pink class as Royal Robe, Cecil Beed, Pink Opal, Jayeff, and Patricia Lehman it is hard to see how any improvements would be possible.

We have liked the performance of Huntsman and Carnival here in the Upper Midwest. I wish they were somewhat earlier to bloom.

We have several new reds coming up that we hope to introduce next year. One of these has been named Crown Jewel. It is an excellent free-growing plant and a good color in bloom in late September. The old standbys Courageous and Red Velvet have a new deep crimson competitor in Success. This last-named one looked very good to us here this past season.

When the day arrives that we have as many good white garden Mums as we have yellows, I think we will have almost reached Utopia. The need today is for more and better white garden Mums. We have several now that are good, but I think improvement is possible. The best whites, I think, are Shalimar, Ermine, Avalanche, Paper White, and White Tower.

We hit the jackpot in spoons, and just as soon as we can propagate the existing selections and introduce them we will have every possible color of Mum represented in the spoon class. I think perhaps the day of the hardy quilled and spider garden Mums is at hand as some interesting new things have shown up in some of our last crosses.

Here are random notes sent in by people around the country who have grown our Mums. We pass them on to you for what they are

worth.

-Mr. C. E. Q. of Washington, D. C., reports the following: "Lee Powell was head and shoulders above everything-new and old. Fine rugged 50-inch plant, fine 4-inch, golden yellow blooms, just irregular enough to be interesting. It will take a place among the 'all-time greats' in my garden. Holiday was good, a few shades darker than Lee Powell and very much like it. Beacon—fine as usual. I can count on Beacon. Carmine Queen is a new red shade that grows and blooms nicely. Pleased everyone. Charles Nye turned in a remarkably fine score-fine plant, fine 4-inch pompon blooms. Cydonia, fine and dependable as usual. Defiance—what a piercing color! Always comes through! Ermine and Shalimar are the best whites I saw and as good as any in my garden. Inspiration—why, with Kathleen Lehman around? Ivory Glow, very fine. In its season, the best. Magenta Spoon, very good. Meditation—until Lee Powell, my all-round favorite Mum. Myrtle Walgreen, best purple of all. Patricia Lehman was one of the high spots in my garden. A real pink with vigor and nicesized bloom. Red Ridinghood and Carmine Queen are the best reds in my garden. Remembrance, I like. Rated third in my garden. Shalimar, very fine all around. A lovely plant. Sincerity turned in a good score. Twilight, best of its sort and color. White Tower had a fine record. Grew well and strong. Lots of nice white pompons. A huskier White Wonder.'

Mr. J. A. M. of Warren, Ohio, reports: "I liked Magenta Spoon last year very much."

Mrs. M. C. of Merchantville, New Jersey, says: "I saw Masquerade last fall in its full splendor and feel that it's a must in my garden.

Mrs. C. L. H. of Cherokee, Iowa, reports: "Everyone who saw Defiance admired it. Magnificent made a fine show. Chris Columbus and Betty were also very lovely.

From Dalton, Pennsylvania, Mrs. C. J. S. comments: "I especially liked Chris Columbus, Red Velvet, Prelude, Avalanche, and Defiance this past season.

Mr. W. O. C. of South Lincoln, Massachusetts, writes: "Cardinal Spoon, Tribute, Magenta Spoon, and Dawnrose were liked by everyone who saw them. They caused considerable comment.

Mrs. B.P. of Chicago, Illinois, says: "My **Chris Columbus** was the talk of the neighborhood. I never saw so many flowers on one

Mr. and Mrs. J. O. S. of Cedar Rapids, Iowa, comment: "We wish to report that Defiance, Ermine, Magnificent, Mrs. H. E. Kidder, Illuminator, Inspiration, Mary Harrison (very beautiful) and, of course, the spoons were very lovely.

From Kansas City, Missouri, Mrs. C. M. C. reports: "The plants I received from you last year bloomed beautifully. Cardinal Spoon

was my favorite.

Sister M. F. of LaCrosse, Wisconsin, comments: "Three varieties gave us exactly what we have been looking for in cut flowers for church decoration—Lee Powell, Beacon, and Magnificent. These combined in huge baskets on pedestals gave great honor to God and much enjoyment to the heart of every Sister here. We so wished you could have walked into our chapel and seen them-they were all the glowing shades of autumn in perfectly formed flowers with wonderful stems.'

Mrs. H. F. H. of Flint, Michigan, says: "We certainly have had a lot of comments on the **Yellow Spoon** blooms this past season." From Neosho, Missouri, Mrs. S. S. reports: "Last fall in an early flower show Lentoned a limit has tall for the comments."

flower show I entered a luncheon table featuring Yellow Avalanche and received a blue ribbon. In a late show my floor basket of Betty received a white ribbon.

Another comment on **Yellow Spoon** was received from Mrs. A. M. of Wesbter Grove, Missouri: "Your loveliest flower of all is **Yellow** Spoon. I got one from you several years ago and it started a Yellow Spoon rage here. E. C. Lehman

OUR COVER

Our cover shows a planting of Mums around the Doll House. The grandfather of Ruthann, Kathleen, and Patricia built the Doll House some fifteen years ago when they were little girls. Now that they have outgrown the use for a Doll House, the building is being maintained and made an ideal setting for the picture. The varieties used in the picture are Orange Buff, Blushwhite, Chiquita, Martin's White, Red Torch, Betty, Canary, Cecelia, Ruthann Lehman, Patricia Lehman, Aztec Gold, Carnival, Cecil Beed, and Ming.

THE BEST GARDEN TOOL EVER INVENTED

"THE ALL-PURPOSE HOE"

A Real Tool. Don't Miss Trying It!

Here is positively the newest, finest and best garden tool ever invented. Made in Faribault. We use it. Entirely new in style and so much easier to use. You stand more erect—no tired back.

LIGHT-It weighs only 24 ounces.

SHARP—Hardened and tempered steel blade.

STRONG—Tough material—for tough work.

PRACTICAL—Gets in between and around plants.

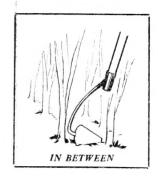

We have never sold tools. However, after using this tool in our own gardens for four years we are so delighted with it that we want you to have one too. We just can't say enough for it. Take our word—no matter how many hoes you have tried—you will like this one better.

A simple change did it. The handle is in line with the center of the blade. Hoe with either edge. Dig in with the point. It cuts. It scours. It really digs.

See the "Gooseneck". You reach around plants. You get in between. You can hoe, dig or mulch equally well. Much of the weeding you formerly did on your knees you can now do standing erect.

HERE IS OUR OFFER

\$1.75 POSTPAID

THE LEHMAN GARDENS — FARIBAULT, MINNESOTA

USERS SAY---

Last summer I purchased several of your hoes, one for myself and the others for neighbors. I am wondering if I can get another one. It seems my husband and I both want to use it at the same time and just having one doesn't work out. We think we just can't get along without it.—Mrs. WB, Prairie View, Illinois.

I am writing to tell you I received my hoe in due season and want to tell you I am certainly proud of the fine job it can do. I am ordering another for a friend of mine as a birthday gift and I know it makes a wonderful gift as I wouldn't take twice what I gave for mine and have to do without it.—Mrs. RBS, Roach, Missouri.

Thanks very much for the Hoe received. It is the best little tool I have ever used. My hobby is Roses and Chrysanthemums and this little hoe is so good to use around my plants.

-Mrs. OFS, Massillon, Ohio

I guess I am going to have to hide my hoe or else go in the hardware business as I have another friend who wants an "AII-Purpose Hoe" like mine.—Mrs. AL, Prairie View, Illinois.

In May I ordered one of your hoes for my wife. I liked it so well I use it all the time. Neither one of us like to hoe unless we use it. So I will have to have another one.—FBVD, Kansas City, Kansas.

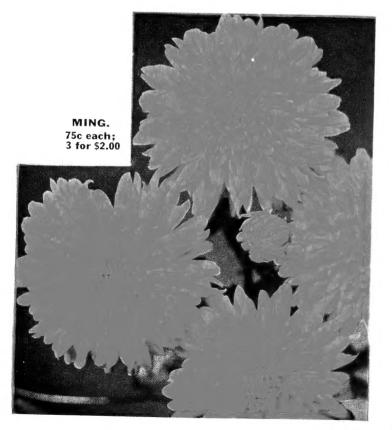

Everyone that has seen mine likes them better than any they have seen. They are simply wonderful and I wouldn't sell mine at any price if I couldn't get another.—Miss LBD, Fort Worth, Texas.

With my Chrysanthemum order of last spring I also purchased a small triangular bladed hoe. This weapon has been so very effective I'd like to have two more.—LMC, Short Hills, New Jersey.

Received the garden hoe and like it so well I would like to have you send me two more. It is the handiest garden tool I ever have used and am telling all my friends about it.—LMC, Akron, Ohio.
